30 01. Determine os máximos e mínimos relativos da função

$$f(x) = \frac{3x^2+x+1}{x^2+x+1}$$

40 02. Uma empresa precisa fabricar embalagens cilíndricas, com tampa, de modo que possa conter, exatamente, um volume fixo igual a $V = 250.\pi \text{ dm}^3$. Determine o raio da base (r) e a altura (h) para que seja mínima a área superficial utilizada na construção dessa embalagem cilíndrica. Encontre o valor dessa área superficial mínima utilizada nessa embalagem.

Obs.: Área Superficial $A(r, h) = 2\pi.r^2 + 2\pi.r.h$.

Obs.: Volume $V(r, h) = \pi.r^2.h$
